

Synopsis

Project Title

SketchScape – Digital Art Portfolio

Introduction

SketchScape is a responsive and interactive web application designed to showcase an artist's sketches, illustrations, and creative works in an elegant digital gallery. The website provides a visually engaging platform where visitors can explore artwork, learn about the artist, and appreciate the creative journey through a modern and user-friendly interface.

Objective

The primary objective of this project is to develop a responsive frontend website that presents an artist's portfolio professionally while demonstrating modern web development techniques such as responsive design, interactive UI components, image galleries, filtering, and animations.

Features

- Responsive homepage with a featured artwork section.
- Digital gallery displaying sketches in an attractive grid layout.
- Category-based filtering (Portraits, Nature, Architecture, Anime, etc.).
- Search functionality to find artworks quickly.
- Detailed artwork view with title, description, medium, and creation date.
- Artist profile showcasing biography, inspiration, and creative journey.
- Contact form for feedback or commission requests.
- Dark/Light mode and smooth animations for an enhanced user experience.

Technologies Used

- HTML5
- CSS3
- JavaScript (ES6)
- React.js
- React Router
- Tailwind CSS or Bootstrap
- Local Storage (for theme and favorites)

Expected Outcome

The final website will serve as a professional digital portfolio that allows artists to display their work in an organized and visually appealing manner. It will demonstrate frontend engineering concepts such as responsive design, component-based architecture, state management, routing, and interactive user interfaces, while providing visitors with an immersive experience across desktop, tablet, and mobile devices.

Conclusion

SketchScape is a practical frontend engineering project that combines creativity with modern web technologies. It highlights both technical development skills and UI/UX design principles, making it an effective portfolio project that can be completed within two weeks while offering a real-world solution for artists to showcase their creativity online.
